Title: Excellent Reproduction

Comments: Another faithful reproduction by WPG! The only noticeable defect from originals was grinder marks on the back of the shovel.

Title: porous welds, scoop bent, wooden filler material

Comments: It might work, but not well made. Has wooden filler wedges under welded seams on handle/scoop junction, very course turnings and rivets not flush

Title: T-handle shovel

Product Reviews

Comments: Some quality issues surrounding the shovel head metal. Mine looked like it had been worked very roughly. However, having said that it doesn't in any way detract from the piece and shipping was super fast!

Title: M1910 T-Handle Entrenching Tool

Comments: Yours has the look and feel of real. It is a little crude when compared to your closest competitor, but the Bondo cracked on his, when I used it to pound in tent pegs. If you would use satin paint instead of flat, it would appear to be more "finished".

Title: M-1910 Shovel

Comments: This is a great reproduction. The rivets are a little rough compared to original, but overall I am quite pleased with the appearance and quality.

Title: Great!

Comments: Don't take your original into the field anymore. Jerry's repro looks the part and is still functional. Our unit exclusively uses the WPG reproduction shovels and we have never had a problem with them.
