Title: A Good Marching Compass

Product Reviews

Comments: The US Wrist Compass by Taylor is is an accurate reproduction of a widely issued WW2 compass. It can be seen in many pictures of airborne troops who participated in the invasion of Normandy. The Taylor wrist compass is suitable for land navigation and keeping an azimuth while walking. You should also keep a true lensatic compass with you for accurate land navigation and map reading. The wrist strap is generous. You can wear this outside your clothing even with winter gear and gloves.

Title: US Wrist Compass with Leather Strap

Comments: It's important to me that I not sound overly picky here as I've always been very pleased with the things I get from WPG. The compass itself is really very nice, works and is a solid accurate representation. The strap on the other hand, for lack of better ways to say it, just sucks. It dry and brittle and didn't even make it onto the compass with out starting to fall apart. That being said, I am still very happy with the rest of my order and as always, DHL shipping is simply a modern marvel (or perhaps scientific anomaly) Unless UAE is some kind of geographical oddity, I cannot for the life of me figure out how my order was packaged and mailed to South East Tennessee in just 3 days (if that). Remarkable.

Title: Good wrist compass & bad leather strap

Comments: The wrist compass is awesome! One of the best replicas for buy all over the world! Not the same with the leather strap, low quality make that the external leather cape breaks. Regardless it worth for the awesome wrist compass.

Title: Wrist compass

Comments: The compass is good repro. The strap on my compass fell apart into little pieces when I took it out of the plastic bag it came in. The strap leaves something to be desired! I had to make a strap of my own to make the event I was going to but everyone liked the compass.
